In Class (Instructor)

Begin Here.

1. Instructor assigns a problem to each group of students. Problems may be identical or distinct, but they generally address related content.

In Class (Students)

2. In groups, students try to solve their assigned problem.

3. In groups, students move around the class room and peer-review the work completed by another group, making annotations and providing feedback.

4. In groups, students examine the feedback provided by their peers before finalizing their response.

5. Instructor evaluates all responses with the class, highlighting any errors and distinct procedures for arriving at correct solutions.
