

Inquiry-based Learning

SALTISE

Description:

Inquiry-based learning is an instructional approach that enables students to learn through first-hand applied experimentation. Consult the SALTISE website for more details on [Inquiry-based Learning](#) and to see how other instructors in the SALTISE community are using this in their courses visit [Inquiry-based Activities](#)

Preparation (Instructor)

In Class (Instructor)

Activities (Students)

Assessments

Artifacts

By establishing the overall purpose of an inquiry, students can better comprehend and see the link from theory to practice.
