Peer Review

By Ian Gold

Description:

In this semester-long activity, students submit a paper to Peerceptiv, which then goes through two rounds of peer review and resubmission. This gives students experience with the revising their written work based on feedback. See full description here.

Out of Class (Instructor) **Out of Class (Students)** **In Class (Instructor)** **In Class (Students)** **Peerceptive**

Introduce Activity

Provide students with instructions for the paper and for signing up for Peerceptive.

Write First Draft

- Write first draft of paper
- Submit to Peerceptiv

Send Papers for Feedback

Automatically send 4 papers to each student.

. . .

Evaluate and Rate Peers' Papers

- Read and evaluate the 4 papers from Peerceptiv, using comment prompts set by instructor
- Rate each component numerically on a scale of 1-10

Evaluate Feedback & Revise

- Evaluate/comment on the helpfulness of the comment received from each reviewer on own paper
- Using reviewer feedback, revise paper and resubmit

Note: After second round of feedback and revision, submit final draft for grading

Repeat a second time

Assign Grades

Using the Peerceptiv algorithm, it assigns the final grade for the paper based on:

- Both rounds of peer reviews
- Retroactive feedback on reviews
